TypeScript, JavaScript, Python, Bash, Linux

Front-End

React, Redux, React Native, Expo, Next.js, Jest, React Testing Library, Webpack, Vite, HTML5, CSS3, Sass, Tailwind, Accessibility (WCAG), Figma, Storybook

Back-End

Docker, Node, Express, SQL, NoSQL, GraphQL

Certifications

AWS Developer Associate
AWS Cloud Practitioner

Education

University of North Texas, Denton

Computer Science Bachelor's
Mathematics Minor

University of Colorado, Boulder

Online Computer Science Master's (in-progress)

Experience

Starbucks Contract, Senior Front-End Engineer

AIM Consulting | Remote | January 2025 - September 2025

Project: MyDaily Internal Application. Individual contributor focused on front-end development and feature delivery for the primary web application used by store and district managers across all Starbucks locations.

- Stack: **React**, **TypeScript**, styled-components, GraphQL
- Established a robust development environment: configured ESLint, Husky, lint-staged, Prettier, and TypeScript for consistent code quality
- Created a Git hook that executes a Node script to run TypeScript compilation, ESLint linting, and Jest tests in parallel, streamlining development workflow
- Rewrote extensive enzyme tests using React Testing Library in preparation for React upgrade
- Maintained shared UI components while adapting to evolving backend APIs
- Added performance analytics for image-upload latency, providing actionable insights for optimization
- Integrated Qualtrics survey tooling directly into the web app to capture real-time user feedback
- Implemented in-app feature flags for controlled, selective rollouts of new functionality

WebMD Contract, Senior Front-End Engineer

Experis Consulting | Remote | February 2023 - July 2024

- Stack: **React**, **TypeScript**, Tailwind, Vite, Lit
- Developed a "Universal Content Presentation" Lit web component that renders Healthwise content and was embedded in various internal and client-owned applications
- Developed a client-facing content app for Healthwise's health content
- Ensured applications met WCAG accessibility specifications
- Developed features for and maintained another application that controlled publishing articles

Optum Contract, Senior Front-End Engineer

Signature Consultants | Remote | March 2022 - October 2022

- Stack: **React**, **TypeScript**, SCSS/Sass, Next.js, Node
- Maintained legacy Next.js application
- Developed React wrapper for hosting an external JavaScript app

Bank of America Contract, Senior Front-End Engineer

Signature Consultants | Remote | September 2021 - March 2022

- Stack: **React**, **TypeScript**, SCSS/Sass, Node
- Developed 3CS, a downtime notification tool
- Developed DeltaApp, a React app for tracking internal applications

SAVI Controls, Front-End Engineer

Carrollton, Texas | May 2019 - September 2020

- Stack: **React**, **TypeScript**, Meteor.js, React Native, Expo, SCSS/Sass, Node
- Developed a React inventory management application
- Developed React Native companion application for inventory management application that had bulk product importing and a QR product scanner
- Hosted React Native application on Expo
- Developed React application for a network-based game console streaming system for GameStop

IBM Contract, Front-End Engineer

TEKsystems, Addison, Texas | September 2018 - May 2019

- Stack: **React**, **TypeScript**, SCSS/Sass, Node, GraphQL
- Developed a website that manages SoftLayer's bare-metal and virtual servers
- Developed paginated GraphQL service and table component system for servers
- Developed a toast notification system

Flywheel, Software Engineer

Addison, Texas | February 2018 - August 2018

- Stack: **React**, **TypeScript**, Meteor.js, SCSS/Sass, Node, GraphQL
- Developed features for React Native app, Node, and GraphQL services
- Migrated legacy Meteor.js codebase to Node microservices, GraphQL, and React Native application

Ulyngo, Software Engineer Intern

San Francisco, California | July 2016 - December 2017

- Stack: **React**, **JavaScript**, Angular.js, CSS, PHP, Laravel
- Created new React interface in place of legacy Angular.js interface for legacy ecommerce site
- Created email notification service with Sendgrid
